

Biological journals in the Catalogue of articles (OLC)

The catalogue of articles integrated into vifabio currently contains bibliographic details for more than 1.5 million essays from biological journals. The catalogue can be searched in conjunction with further catalogues using an all-encompassing search, or separately by selecting the appropriate database in the Advanced Search function. Most articles link to the Regensburg Electronic Journals Library (Elektronische Zeitschriftenbibliothek) and the subito document delivery service to enable quick access to full-text.

The following list documents the biological journals covered in the catalogue of articles (with identification numbers from Zeitschriften-Datenbank - ZDB) . It contains roughly 1,900 journals. The catalogue covered in vifabio is based on the multidisciplinary indexing service SwetScan, from Swets Information Services.
